

## BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

### October 2018: Economic Sentiment decreases in both the euro area and the EU

In October, the *Economic Sentiment Indicator* (ESI) decreased in both the euro area (by 1.1 points to 109.8) and the EU (by 0.8 points to 110.4).<sup>1</sup>

#### Euro area developments

The drop in euro-area sentiment was caused by weaker confidence in industry, services and, particularly, retail trade. Confidence in construction and among consumers held up well, moving essentially sideways. Amongst the largest euro-area economies, the ESI rose only in Spain (+1.9), while it booked losses in Germany (-1.3), the Netherlands (-1.3), France (-1.2) and Italy (-0.9).

**Industry confidence** posted the sharpest decline since March (-1.7), reflecting managers' worsened assessments of the *stocks of finished products* and, in particular, the *current level of overall order books*, which were mitigated only slightly by virtually unchanged *production expectations*. Of the questions not included in the confidence indicator, managers' assessments of *past production* and, more so, *export order books* clouded over. **Services confidence** eased (-1.1) due to a deterioration in all its components, i.e. managers' *demand expectations*, their appraisals of the *past business situation* and, in particular, of *past demand*. Bucking the trend, **consumer confidence** remained virtually unchanged (+0.2), as slightly increased concerns about the *future general economic situation* were offset by consumers' mildly improved *savings expectations* and views on their *future financial situation*. *Unemployment expectations* remained unchanged. **Retail trade confidence** saw a significant deterioration (-3.2), caused by managers' much grimmer views on the *present and expected business situation*; appraisals of the *volume of stocks* were broadly unchanged. **Construction confidence** remained virtually flat (-0.3), resulting from a combination of improved *employment expectations* and more cautious assessments of the level of *order books*. Finally, **financial services confidence** (not included in the ESI) improved on the back of brighter assessments of *expected* and, especially, *past demand*, which were only partly offset by more tepid assessments of the *past business situation*.

**Employment plans** improved in construction and, to a lesser extent, services, while they deteriorated in industry and retail trade. **Selling price expectations** firmed in retail trade, construction and, very mildly, in services, while they shrank in industry. Consumer price expectations continued the upward trend observed over the last five months.

#### EU developments

The marginally better development of the ESI in the EU (-0.8) can be attributed to virtually unchanged sentiment in the largest EU economy outside the euro area, the UK (+0.2), as well as comparatively moderate losses (-0.9) in the Polish indicator. From a sectoral perspective, the deterioration in industry, services and retail trade confidence was less pronounced in the EU, while sentiment in construction and among consumers remained broadly flat, in line with euro-area developments. As regards financial services confidence, the EU aggregate moved essentially sideways, rather than picking up.

<sup>1</sup> Business confidence indices for France and Cyprus were revised compared to the September press release; the net effect is a downward revision of the ESI for September of 0.1 points in the EU (to 111.2).

The evolution of managers' employment expectations in the EU mimicked those in the euro area, with increases in services and construction on the one hand and drops in industry and retail trade on the other. By contrast, with the exception of the decrease in industry, developments in EU price expectations generally differed from those in the euro area: they declined in retail trade and construction, while they stayed virtually unchanged in services. Furthermore, the rise in consumer price expectations was more muted than in the euro area.

### Quarterly survey results (conducted in October)

In the euro area manufacturing sector, the estimated rate of *capacity utilisation* decreased, for the third quarter in a row, to 83.9% (0.3 points lower than in the previous survey carried out in July). Accordingly, the share of managers assessing their *current production capacity* as 'more than sufficient' (in view of current order books and demand expectations) increased (+0.6 points). On the external side, managers' *export volume expectations* decreased (-3.7) to their lowest level in some 2 ½ years, as did their assessments of their *competitive position on foreign markets outside the EU* (-1.8). In line with those grim assessments, managers' appraisals of developments in *new orders* saw the strongest deterioration in seven years (-10.0). EU-wide developments were qualitatively in line with those in the euro area, including the evolution of *capacity utilisation*, which shed 0.4 points and currently stands at 83.4%.

In October 2018, *capacity utilisation in services* decreased in the euro area (-0.5 points to 90.1%) and, slightly so, in the EU (-0.1 points to 89.6%).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2017) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2018.

(a) Business surveys for Ireland have been temporarily discontinued as from 05/2008.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 1990.

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e. differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

TABLE 3a: Quarterly survey of services (s.a.)

(Data collected in January, April, July and October each year.)

## Capacity utilisation in services (%)

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

## Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A3), Sector Business and consumer surveys and short-term forecast.
