**COMMISSION OPINION**

**of 21.11.2023**

**on the Draft Budgetary Plan of Malta**

{SWD(2023) 951 final}

(Only the English and Maltese texts are authentic)

**EN**

**EN**

## COMMISSION OPINION

**of 21.11.2023**

### **on the Draft Budgetary Plan of Malta**

(Only the English and Maltese texts are authentic)

#### **GENERAL CONSIDERATIONS**

1. Regulation (EU) No 473/2013<sup>1</sup> lays down provisions for enhanced monitoring of budgetary policies in the euro area, in order to ensure that national budgets are consistent with the economic policy guidance issued in the context of the Stability and Growth Pact and the European Semester for economic policy coordination.
2. Article 6 of Regulation (EU) No 473/2013 requires Member States to submit annually to the Commission and to the Eurogroup a Draft Budgetary Plan, by 15 October, setting out the budgetary targets for the forthcoming year, and outlining the main aspects underlying the budgetary outlook for general government and its subsectors.
3. On 8 March 2023, the Commission adopted a Communication<sup>2</sup> providing fiscal policy guidance for 2024, which confirmed that the general escape clause of the Stability and Growth Pact will be deactivated at the end of 2023.
4. On 26 April 2023, the Commission presented three legislative proposals<sup>3</sup> to implement a comprehensive reform of the EU fiscal framework. The central objective of the proposals is to strengthen public debt sustainability and to promote sustainable and inclusive growth through reforms and investments. In its proposals, the Commission aims at improving national ownership, simplifying the framework and moving towards a greater medium-term focus, combined with effective and more coherent enforcement. According to the Council Conclusions adopted on 14 March 2023<sup>4</sup> and on 27 October 2023<sup>5</sup>, the objective is to conclude the legislative work in 2023. As a new legal framework, based on the outcome of the ongoing economic governance review, is not yet in place, the current legal framework continues to

---

<sup>1</sup> Regulation (EU) No 473/2013 of the European Parliament and of the Council of 21 May 2013 on common provisions for monitoring and assessing draft budgetary plans and ensuring the correction of excessive deficit of the Member States in the euro area, (OJ L 140, 27.5.2013, pp. 11).

<sup>2</sup> Communication from the Commission to the Council, ‘Fiscal policy guidance for 2024’, 8.3.2023, COM(2023) 141 final.

<sup>3</sup> Commission Proposal for a Regulation of the European Parliament and of the Council on the effective coordination of economic policies and multilateral budgetary surveillance and repealing Council Regulation (EC) No 1466/97, 26.4.2023, COM(2023) 240 final; Commission Proposal for a Council Regulation amending Regulation (EC) No 1467/97 on speeding up and clarifying the implementation of the excessive deficit procedure, 26.4.2023, COM(2023) 241 final; Commission Proposal for a Council Directive amending Directive 2011/85/EU on requirements for budgetary frameworks of the Member States, 26.4.2023, COM(2023) 242 final.

<sup>4</sup> Council Conclusions on ‘Orientations for a reform of the EU economic governance framework’ of the ECOFIN Council meeting, 14.3.2023, 6995/1/23 – REV 1.

<sup>5</sup> European Council meeting (26 and 27 October 2023) – Conclusions, EUCO 14/23.

apply. The fiscal component of the Spring 2023 country-specific recommendations included elements of the legislative proposals of 26 April 2023 that were consistent with the existing legislation.

5. As announced, in its fiscal policy guidance for 2024<sup>6</sup>, the Commission will propose to the Council to open deficit-based excessive deficit procedures in spring 2024, on the basis of the outturn data for 2023, in line with the existing legal provisions. Member States were invited to take this into account when executing their 2023 budgets and preparing their Draft Budgetary Plans for 2024.
6. The Recovery and Resilience Facility<sup>7</sup> provides financial support for the implementation of reforms and investments, notably to promote the green and digital transitions. The Facility also aims at increasing the resilience of the Union's energy system by reducing dependence on fossil fuels and diversifying energy supply at Union level ('REPowerEU objectives')<sup>8</sup>. The Facility will strengthen the resilience and potential growth of Member States' economies, which contributes to job creation and sustainable public finances. Part of this support takes the form of non-repayable financial support ("grants"), entailing a fiscal impulse financed by the Union. Together with cohesion policy funds and the Just Transition Mechanism, the Facility is supporting a fair and inclusive recovery in the EU, in line with the European Pillar of Social Rights.
7. Economic policy should continue to tackle the risks linked to high inflation and address long-term challenges. Despite declining, inflation in the euro area remains a concern. It is essential that inflation continues to fall and that inflation expectations remain well anchored, with consistent monetary and fiscal policies, while remaining agile in the face of high uncertainty. In particular, emergency energy support measures taken to respond to the energy price shock should be wound down, using the related savings to reduce the government deficits, as soon as possible in 2023 and 2024. Should renewed energy price increases necessitate new or continued support measures, these should be targeted at protecting vulnerable households and firms, as well as be fiscally affordable and preserve incentives for energy savings. Furthermore, Member States should continue to preserve nationally financed public investment and ensure the effective absorption of grants under the Recovery and Resilience Facility and of other EU funds, in particular to foster the green and digital transitions.

#### *CONSIDERATIONS CONCERNING MALTA*

8. On 16 October 2023, Malta submitted its Draft Budgetary Plan for 2024. On that basis and taking into account the Council Recommendation to Malta of 14 July

---

<sup>6</sup> Communication from the Commission to the Council, 'Fiscal policy guidance for 2024', 8.3.2023, COM(2023) 141 final.

<sup>7</sup> Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility, (OJ L 57, 18.2.2021, p. 17).

<sup>8</sup> Regulation (EU) 2023/435 of the European Parliament and of the Council of 27 February 2023 amending Regulation (EU) 2021/241 as regards REPowerEU chapters in recovery and resilience plans and amending Regulations (EU) No 1303/2013, (EU) 2021/1060 and (EU) 2021/1755, and Directive 2003/87/EC (OJ L 63, 28.2.2023, p. 1).

2023<sup>9</sup>, the Commission has adopted the following opinion in accordance with Article 7 of Regulation (EU) No 473/2013.

9. On 24 May 2023, the Commission adopted a report under Article 126(3) of the TFEU<sup>10</sup>. That report assessed the budgetary situation of Malta, as its general government deficit in 2022 exceeded the Treaty reference value of 3% of GDP. The report concluded that the deficit criterion was not fulfilled.
10. According to the Draft Budgetary Plan, Malta's real GDP is projected to grow by 4.2% in 2024 (4.1% in 2023), while HICP inflation is forecast at 3.7% in 2024 (5.7% in 2023). Similarly, according to the Commission 2023 autumn forecast, Malta's real GDP is projected to grow by 4.0% in 2024 (4.0% in 2023), while HICP inflation is forecast at 3.3% in 2024 (5.7% in 2023). Overall, the macroeconomic scenario underpinning the budgetary projections in the Draft Budgetary Plan appears to be in line with the Commission's 2023 autumn forecast for 2023 and 2024. Malta complies with the requirement of Article 4(4) of Regulation (EU) No 473/2013, since the Draft Budgetary Plan is based on independently endorsed macroeconomic forecasts.
11. According to the Draft Budgetary Plan, Malta's general government deficit is projected to decrease to 4.5% of GDP in 2024 (from 5.0% in 2023), remaining above 3% of GDP. This decrease is mainly driven by the decrease as a share of GDP of intermediate consumption, social payments and subsidies, also due to the expected phasing-out of the costs related to the national airline, partially compensated by an increase as a share of GDP of the energy support measures and interest expenditures. The general government debt-to-GDP ratio is set to increase to 55.6% at the end of 2024 (from 53.1% at the end of 2023). In turn, according to the Commission 2023 autumn forecast, Malta's general government deficit is projected to decrease to 4.6% of GDP in 2024 (from 5.1% in 2023), while the general government debt-to-GDP ratio is set to increase to 55.8% at the end of 2024 (from 53.3% at the end of 2023).
12. Based on the Commission's estimates, the fiscal stance<sup>11</sup> is projected to be contractionary at 1.7% of GDP in 2024, following a broadly neutral fiscal stance of 0.1% in 2023.
13. The Draft Budgetary Plan assumes that expenditure amounting to 0.4% of GDP will be backed by non-repayable support ("grants") from the Recovery and Resilience Facility in 2024, compared to 0.4% of GDP in 2023. This is in line with the assumptions underlying the Commission 2023 autumn forecast. Expenditure financed by Recovery and Resilience Facility grants will enable high-quality investment and productivity-enhancing reforms without a direct impact on the general government balance and debt of Malta.
14. According to the Commission 2023 autumn forecast, taking into account the information contained in the Draft Budgetary Plan, the measures adopted to mitigate

---

<sup>9</sup> Council Recommendation on the 2023 National Reform Programme of Malta and delivering a Council opinion on the 2023 Stability Programme of Malta, OJ C 312, 1.9.2023, p. 167.

<sup>10</sup> Report from the Commission, prepared in accordance with Article 126(3) of the Treaty on the Functioning of the European Union, 24.5.2023, COM(2023) 631 final.

<sup>11</sup> The fiscal stance is measured as the change in general government primary expenditure, net of the incremental budgetary impact of discretionary revenue measures, excluding one-off and cyclical unemployment expenditure, but including expenditure financed by non-repayable support (grants) from the Recovery and Resilience Facility and other EU funds, relative to medium-term (10-year) average potential GDP growth rate, expressed as a ratio to nominal GDP.

the economic and social impact of the increase in energy prices are expected to remain in place beyond the end of 2024. They consist of measures extended from 2023 in particular, cuts to indirect taxes on energy consumption and subsidies to energy production to compensate for the price increase of imported electricity and carbon emissions. In addition, the Draft Budgetary Plan includes several new expenditure measures for 2024 that are not directly related to energy price developments. These include various measures to promote inclusion that increase social spending. The aggregate cost of these measures is estimated by the Commission at 0.1% of GDP in 2024 and are not expected to have a permanent impact on public finances.

15. On 14 July 2023, the Council recommended that Malta ensure a prudent fiscal policy, in particular by limiting the nominal increase in nationally financed net primary expenditure<sup>12</sup> in 2024 to not more than 5.9%. According to the Commission 2023 autumn forecast, Malta's net nationally financed primary expenditure is projected to increase by 5.5% in 2024, which is below the recommended maximum growth rate. This is in line with what was recommended by the Council.
16. Moreover, the Council recommended that Malta take action to wind down the emergency energy support measures in force, using the related savings to reduce the government deficit, as soon as possible in 2023 and 2024. The Council further specified that, should renewed energy price increases necessitate new or continued support measures, Malta should ensure that these were targeted at protecting vulnerable households and firms, fiscally affordable, and preserve incentives for energy savings. According to the Commission 2023 autumn forecast, the net budgetary cost<sup>13</sup> of energy support measures is projected at 1.6% of GDP in 2023, 2.0% in 2024 and 1.0% in 2025. In particular, cuts to indirect taxes on energy consumption and subsidies to energy production to compensate for the price increase of imported electricity and carbon emissions are assumed to remain in force in 2024 and 2025<sup>14</sup>. The energy support measures are not projected to be wound down as soon as possible in 2023 and 2024. This risks being not in line with what was recommended by the Council. Consequently, there are no related savings to be used to reduce the government deficit as recommended by the Council. The net budgetary cost of energy support measures targeted at protecting vulnerable households and firms is estimated at 0.2% of GDP in 2024 (0.2% in 2023), and most of these do not preserve the price signal to reduce energy demand and increase energy efficiency.
17. In addition, the Council recommended that Malta preserve nationally financed public investment and ensure the effective absorption of Recovery and Resilience Facility grants and other EU funds, in particular to foster the green and digital transitions. According to the Commission 2023 autumn forecast, nationally financed public investment is projected to increase to 2.9% of GDP in 2024 (from 2.7% of GDP in 2023) and, therefore, it is expected to be preserved. This is in line with what was recommended by the Council. In turn, public expenditure financed from revenues

---

<sup>12</sup> Net primary expenditure is defined as nationally financed expenditure net of discretionary revenues measures and excluding interest expenditure as well as cyclical unemployment expenditure.

<sup>13</sup> The figure represents the level of the annual budgetary cost of those measures, including revenue and expenditure and, where applicable, net of the revenue from taxes on windfall profits of energy suppliers.

<sup>14</sup> Measures that, according to the Draft Budgetary Plan, are not to be phased out in the course of 2024 are, in principle, assumed in the Commission 2023 autumn forecast as having a budgetary impact also in 2025.

from EU funds, including Recovery and Resilience Facility grants, is expected to decrease by 0.7 % of GDP in 2024 (from 1.8% of GDP in 2023). This decrease is driven by the end of the 2014-2020 programming period of EU structural funds, for which funds are available until 2023.

18. Furthermore, on 14 July 2023, the Council also recommended that, for the period beyond 2024, Malta continue to pursue a medium-term fiscal strategy of gradual and sustainable consolidation, combined with investments and reforms conducive to higher sustainable growth, to achieve a prudent medium-term fiscal position. The Draft Budgetary Plan includes medium-term budgetary projections until 2026. The general government deficit is projected to decrease gradually to 4.0% in 2025 and 3.5% in 2026. In turn, general government debt is projected to increase to 56.6% of GDP in 2025 and 57.2% in 2026. General government investment is projected to increase to 4.2% of GDP in 2025 and 4.7% in 2026. According to the Draft Budgetary Plan, these projections are based on high-value added investments and structural reforms towards the green, digital and energy transitions including health and governance, which are also part of the Recovery and Resilience Plan.
19. According to the Commission's forecast, the growth of net nationally financed primary expenditure is projected to respect the recommended maximum growth rate in 2024.

However, according to the Commission 2023 autumn forecast, and taking into consideration the information included in Malta's Draft Budgetary Plan, the emergency energy support measures are not expected to be wound down as soon as possible in 2023 and 2024; on the contrary, the cost of energy support measures is planned to increase in 2024.

Furthermore, Malta is expected to preserve nationally financed public investment. Malta should also continue to ensure the effective absorption of Recovery and Resilience Facility grants and other EU funds.

Overall, the Commission is of the opinion that the Draft Budgetary Plan of Malta is not fully in line with the Council Recommendation of 14 July 2023. Therefore, the Commission invites Malta to wind down the energy support measures as soon as possible in 2023 and 2024.

Moreover, the Commission projects Malta's headline budget deficit at 4.6% of GDP in 2024, above the Treaty reference value of 3% of GDP, and the government debt ratio at 55.8% in 2024, below the Treaty reference value of 60% of GDP.

A comprehensive description of progress made with the implementation of the Council's country-specific recommendations will be included in the 2024 Country Report and assessed in the context of the Council's country-specific recommendations to be recommended by the Commission in spring 2024.

**Table: Key macroeconomic and fiscal figures**

		2022	2023		2024	
		Outturn	DBP	COM	DBP	COM
Real (% change)	GDP	6.9	4.1	4.0	4.2	4.0
