COMMISSION OPINION

of 24.11.2021

on the Draft Budgetary Plan of Ireland

{SWD(2021) 915 final}

(Only the English text is authentic)

COMMISSION OPINION

of 24.11.2021

on the Draft Budgetary Plan of Ireland

(Only the English text is authentic)

GENERAL CONSIDERATIONS

1. Regulation (EU) No 473/2013 sets out provisions for enhanced monitoring of budgetary policies in the euro area, to ensure that national budgets are consistent with the economic policy guidance issued in the context of the Stability and Growth Pact and the European Semester for economic policy coordination.
2. Article 6 of Regulation (EU) No 473/2013 requires Member States to submit annually to the Commission and to the Eurogroup a Draft Budgetary Plan by 15 October, presenting the main aspects of the budgetary situation of the general government and its subsectors for the forthcoming year.
3. On 20 March 2020, the Commission adopted a Communication¹ on the activation of the general escape clause² of the Stability and Growth Pact. In that Communication, the Commission set out its view that, given the expected severe economic downturn resulting from the COVID-19 outbreak, the conditions to activate the general escape clause were met. On 23 March 2020, the Ministers of Finance of the Member States agreed with the assessment of the Commission.³
4. On 3 March 2021, the Commission adopted a Communication providing further policy orientations to facilitate the coordination of fiscal policies.⁴ In that Communication, the Commission set out its view that the decision on the deactivation or continued application of the general escape clause should be taken on the basis of an overall assessment of the state of the economy, with the level of economic activity in the EU or euro area compared to pre-crisis levels (end-2019) as a key quantitative criterion. On 2 June 2021, on the basis of the Commission's 2021 spring forecast, the Commission considered that the conditions to continue to apply the general escape clause in 2022 and to deactivate it as of 2023 were met.⁵ Country-specific situations will continue to be taken into account after the deactivation of the general escape clause.
5. Next Generation EU, including the Recovery and Resilience Facility, supports a sustainable, inclusive and fair recovery. Regulation (EU) 2021/241 established the

² The clause, as set out in Articles 5(1), 6(3), 9(1) and 10(3) of Regulation (EC) 1466/97 and Articles 3(5) and 5(2) of Regulation (EC) 1467/97, facilitates the coordination of budgetary policies in times of severe economic downturn.

Recovery and Resilience Facility⁶ which provides financing support for the implementation of reforms and investments, notably to promote the green and digital transitions, thereby strengthening the economies' resilience and potential growth. Part of this support is in the form of non-repayable financial support (“grants”), entailing a fiscal impulse financed by the EU budget. By contributing to economic recovery and to strengthening long-term growth, it supports public finances, growth and job creation in the medium and long term.

6. On 2 June 2021, the Commission emphasised in its communication that the coordination of national fiscal policies remains crucial to underpin the recovery. In this context, the Commission set out its view that the overall fiscal stance, taking into account national budgets and the Recovery and Resilience Facility, should remain supportive in 2021 and 2022. Fiscal policy should remain agile and adjust to the evolving situation as warranted, and a premature withdrawal of fiscal support should be avoided. Once health risks diminish, fiscal measures should gradually pivot to more targeted measures that promote a resilient and sustainable recovery. Finally, with economic activity gradually normalising in 2021, Member States' fiscal policies should become more differentiated in 2022, taking into account the state of the recovery, fiscal sustainability and the need to reduce economic, social and territorial divergences. All Member States should preserve nationally financed investment. As the recovery takes hold, fiscal policy should prioritise higher public and private investment, supporting the transition towards a green and digital economy.

In its recommendations on the 2021 Stability Programmes on 18 June 2021, the Council also recommended that, when economic conditions allow, Member States should pursue a fiscal policy aimed at achieving prudent medium-term fiscal positions and ensuring fiscal sustainability in the medium term. At the same time, investment should be enhanced to boost growth potential.

The Council, on 13 July 2021, further recommended to euro area Member States⁷ to take action, individually and collectively within the Eurogroup, in the period 2021–2022 to ensure a policy stance that supports the recovery from the COVID-19 crisis. When the epidemiological and economic conditions allow, emergency measures should be phased out while combatting the social and labour-market impact of the crisis. Recalling the need for prudent medium-term fiscal positions and debt sustainability, while enhancing investment, the Council also called for particular attention to the quality of budgetary measures.

The recovery of the European economy has been strengthening, thanks to the improved health situation and easing of pandemic control restrictions. The volume of output in the euro area is expected to return to its pre-pandemic level by the end of the year. However, bottlenecks in global supply and rising energy and commodity prices have been increasingly weighing on activity in the EU. This together with production bottlenecks due to the shortage of some input components and raw materials, and capacity constraints vis-à-vis booming demand both in the EU and internationally have been putting upward pressure on consumer prices.

7. On 18 June 2021, in its recommendations on the 2021 Stability Programmes, the Council highlighted that the established indicators of fiscal adjustment set out in

⁶ OJ L57, 18.2.2021, p.17.

⁷ Council Recommendation of 13 July 2021 on the economic policy of the euro area, OJ C 283, 15.7.2021, p. 1.

Regulation (EC) No 1466/97 need to be considered in the context of the current circumstances. Specifically, the assessment of the overall fiscal stance at the current juncture should take into account the transfers from the EU budget (such as those from the Recovery and Resilience Facility). Furthermore, the assessment also needs to take into account the phasing-out of crisis-related temporary emergency measures that were designed to support health systems and compensate workers and firms for the losses in income due to lockdowns and supply chain disruptions, while their withdrawal is accompanied by the easing of lockdown restrictions that will support growth.

Accordingly, the fiscal stance in 2021 and 2022 is measured by the change in primary expenditure (net of discretionary revenue measures), excluding crisis-related temporary emergency measures but including expenditure financed by grants under the Recovery and Resilience Facility and other EU funds, relative to medium-term potential growth⁸. Going beyond the overall fiscal stance, in order to assess whether national fiscal policy is prudent and its composition is conducive to a sustainable recovery consistent with the green and digital transitions, attention is also paid to the evolution of nationally financed primary current expenditure (net of discretionary revenue measures and excluding crisis-related temporary emergency measures) and investment.

CONSIDERATIONS CONCERNING IRELAND

8. On 15 October 2021, Ireland submitted the Draft Budgetary Plan for 2022. On that basis, the Commission has adopted the following opinion in accordance with Article 7 of Regulation (EU) No 473/2013.
9. On 18 June 2021, the Council recommended that in 2022 Ireland⁹ pursues a supportive fiscal stance, including from the impulse provided by the Recovery and Resilience Facility, and preserves nationally financed investment.

The Council also recommended to pay particular attention to the composition of public finances, on both the revenue and expenditure sides of the national budget, and to the quality of budgetary measures in order to ensure a sustainable and inclusive recovery; to prioritise sustainable and growth-enhancing investment, in particular investment supporting the green and digital transition; and to give priority to fiscal structural reforms that will help provide financing for public policy priorities and contribute to the long-term sustainability of public finances, including, where relevant, by strengthening the coverage, adequacy and sustainability of health and social protection systems for all.

On 2 June 2021, the Commission issued a report under Article 126(3) TFEU.¹⁰ This report discussed the budgetary situation of Ireland, as its general government deficit in 2020 exceeded the 3% of GDP Treaty reference value. The report concluded that the deficit criterion was not fulfilled, while the general government debt did not exceed the 60% of GDP Treaty reference value in 2020.

⁸ The Commission's estimates of medium-term potential growth do not include the positive impact of reforms that are part of the Recovery and Resilience Plan and can boost Ireland's potential growth.

⁹ Council Recommendation of 18 June 2021 delivering a Council opinion on the 2021 Stability Programme of Ireland, OJ C 304, 29.7.2021, p. 28.

¹⁰ Report from the Commission prepared in accordance with Article 126(3) of the Treaty on the Functioning of the European Union, Brussels, 2.6.2021, COM(2021) 529 final.

10. According to the Commission 2021 autumn forecast, Ireland's economy is expected to grow by 14.6% in 2021 and by 5.1% in 2022, while inflation is forecast at 2.3% in 2021 and 3.1% in 2022. According to the Draft Budgetary Plan, Ireland's real GDP is expected to grow by 15.6% in 2021 and 5.0% in 2022, with inflation projected at 2.3% in 2021 and 2.2% in 2022. Both forecasts project growth in 2021 to be largely driven by net exports, which were already very strong in the first half of the year, and supported by the domestic recovery. For 2021, the Commission's forecast is slightly more conservative regarding export growth but more optimistic on private consumption. For 2022, the Commission projects private consumption to grow more moderately but exports to grow faster than projected by the Irish authorities. Overall, the macroeconomic scenario underlying the Draft Budgetary Plan is plausible in 2021 and 2022.

Ireland complies with the requirement of Regulation (EU) No 473/2013 since the draft budget is based on independently endorsed macroeconomic forecasts.

11. Ireland submitted its Recovery and Resilience Plan on 28 May 2021. The Council approved the assessment of Ireland's Recovery and Resilience Plan on 8 September 2021¹¹. The Draft Budgetary Plan assumes that expenditure amounting to 0.03% in 2021, 0.07% in 2022, 0.04% in 2023, and 0.04% in 2024 will be funded by non-repayable financial support (grants) from the Recovery and Resilience Facility. Expenditures financed by Recovery and Resilience Facility grants will enable high-quality investment and productivity-enhancing reforms without a direct impact on the general government deficit and debt. The Commission 2021 autumn forecast includes a similar amount of expenditures financed by Recovery and Resilience Facility grants in its budgetary projections. Simulations by the Commission services show that the Recovery and Resilience Plan, together with the rest of measures of the European Union Recovery Instrument, has the potential to increase the GDP of Ireland by between 0.3% and 0.5% by 2026¹², not including the possible positive impact of structural reforms, which can be substantial, and with spillovers accounting for a large part of the increase.
12. In its 2022 Draft Budgetary Plan, Ireland's general government deficit is planned to decrease from 3.1% of GDP in 2021 to 1.8% of GDP in 2022, mainly due to a fading expenditure response to the pandemic and the economic recovery. The general government debt ratio is planned to decrease from 55.2% of GDP in 2021 to 51.9% of GDP in 2022. These projections are in line with the Commission 2021 autumn forecast. The outlook for public finances continues to be subject to the high uncertainty that surrounds the macroeconomic projections, including risks related to the evolution of the pandemic and possible scarring effects.
13. The main new discretionary revenue measures underpinning the Draft Budgetary Plan for 2022 are changes in income tax and social insurance that are estimated to cost EUR 600 million per year (0.13% of GDP). For discretionary expenditure measures, the Draft Budgetary Plan refers to the Expenditure Report 2022, which is also part of the Budget 2022 package. The main expenditure-increasing measures for 2022 are: additional funding to departments (health, housing or transport) to address

¹¹ Council Implementing Decision on the approval of the assessment of the recovery and resilience plan for Ireland.

¹² These simulations reflect the overall impact of NGEU, which also includes funding for ReactEU, and increased funding for Horizon Europe, InvestEU, JTF, Rural Development and RescEU.

the aftermath of the pandemic (0.3% of GDP); increase in welfare payments and housing allowances (0.13% of GDP); an extension of the Employment Wage Subsidy Scheme to end-April 2022 (0.13% of GDP). Based on the Commission's forecast, the crisis-related temporary emergency measures will decrease from 3.8% of GDP in 2020, to 3.2% in 2021 and 0.3% in 2022. In addition, EUR 4 billion (0.9% of GDP) in 2022 was budgeted but currently unallocated to departments.

According to the Draft Budgetary Plan, gross fixed capital formation of the general government is expected to increase to 2.5% of GDP in 2022, from 2.2% in 2021. These projections are in line with the Commission 2021 autumn forecast. For details relating to the composition of government investment, the Draft Budgetary Plan refers to the National Development Plan 2021-2030 on 4 October 2021, which aims at boosting the economy's stock of infrastructure.

Some of the measures included in the National Development Plan, such as residential retrofit and the National Broadband Plan, are aimed at supporting investment on the green and digital transition, as recommended by the Council on 18 June 2021. A complete assessment of the fiscal-structural reforms implemented by Ireland will be done in the context of the assessment of the implementation of the Recovery and Resilience Plans and the 2022 Country Report.

14. The fiscal stance, which excludes crisis-related temporary emergency measures while including the impact on aggregate demand from investment financed by both the national and the EU budgets, notably the Recovery and Resilience Facility, is projected in the Commission 2021 autumn forecast at -0.4% of GDP in 2022.¹³ Ireland is projected to use the Recovery and Resilience Facility in 2022 to finance additional investment in support of the recovery. The positive contribution to economic activity of expenditure financed by Recovery and Resilience Facility grants and other EU funds is projected to increase by 0.1 percentage points of GDP in 2022 compared to 2021. Nationally financed investment is projected to provide an expansionary contribution to the fiscal stance of 0.1 percentage points in 2022.¹⁴ The growth in nationally financed primary current expenditure (net of new revenue measures) in 2022 is projected to provide a slightly expansionary contribution of 0.1 percentage points to the overall fiscal stance.
15. The Draft Budgetary Plan does not include budgetary projections beyond 2022, although it refers to the government's medium-term budgetary strategy to introduce fixed expenditure ceilings, aligned to the estimated trend growth rate of the economy.
16. In 2022, based on the Commission's forecast and including the information incorporated in Ireland's Draft Budgetary Plan, the fiscal stance, including the impulse provided by the Recovery and Resilience Facility, is projected to be supportive, as recommended by the Council. Ireland plans to provide continued support to the recovery by making use of the Recovery and Resilience Facility to finance additional investment. As recommended by the Council, Ireland plans to preserve nationally financed investment.

¹³ A negative sign of the indicator corresponds to an excess of primary expenditure growth compared with medium-term economic growth, indicating an expansionary fiscal policy.

¹⁴ Other nationally financed capital expenditure is projected to provide a neutral contribution.

The Commission recalls the importance of the composition of public finances and the quality of budgetary measures, including through growth-enhancing investment, notably supporting the green and digital transition. Measures included in the National Development Plan, such as residential retrofit and the National Broadband Plan, are in line with supporting the green and digital transition.

Taking into account the strength of the recovery, Ireland is invited to regularly review the use, effectiveness and adequacy of the support measures and stand ready to adapt them as necessary to changing circumstances.
