## 2 Coverage and target definition

2.1 Are all sectors of the general government covered by the rule?
(Please note that for the purpose of this questionnaire we refer to these sectors of the general government - <a href="central">central</a> government, regional/state government, local government and social security. The questionnaire takes into account that some Member States may not have all of the sectors - in particular regional/state governments.)  *
Questions on coverage are used for two main purposes:  1) To determine among rules covering the same sector, which one has the largest coverage,  2) To estimate the individual coverage of each rule in terms of general government expenditure/revenue.
