# COMMISSION OPINION

of 26.11.2024

## on the Draft Budgetary Plan of Finland

(only the Finnish and Swedish texts are authentic)

### GENERAL CONSIDERATIONS

- (1) Regulation (EU) No 473/2013 lays down provisions for enhanced monitoring of budgetary policies in the euro area, in order to ensure that national budgets are consistent with the economic policy guidance issued in the context of the EU economic governance framework.
- (2) Article 6 of Regulation (EU) No 473/2013 requires euro area Member States to submit annually to the Commission and to the Eurogroup a Draft Budgetary Plan, by 15 October, setting out the budgetary targets for the forthcoming year, and outlining the main aspects underlying the budgetary outlook for general government and its subsectors.
- (3) On 30 April 2024, the new economic governance framework entered into force. The main objectives of the new framework are to promote sound and sustainable public finances, sustainable and inclusive growth and resilience through reforms and investments. The framework helps to make the EU more competitive and better prepared for future challenges by supporting progress towards a green, digital, inclusive, and resilient economy.
- (4) In order to simplify the Union fiscal framework and increase transparency, a single operational indicator, anchored in debt sustainability, serves as a basis for setting the fiscal path and for carrying out annual fiscal surveillance for each Member State. That single operational indicator is the nominal growth rate of net expenditure<sup>1</sup>.
- (5) The Recovery and Resilience Facility<sup>2</sup> provides financial support for the implementation of reforms and investments, notably to promote the green and digital transitions. The Facility also aims at increasing the resilience of the Union's energy system by reducing dependence on fossil fuels and diversifying energy supply at Union level ('REPowerEU objectives'). The Facility is expected to strengthen the resilience and potential growth of Member States' economies, which contributes to job creation and sustainable public finances. Part of this support takes the form of non-repayable financial support ("grants"), entailing a fiscal impulse financed by the Union. Together with cohesion policy funds and the Just Transition Mechanism, the

---

<sup>1</sup> According to Article 2(2) of Regulation (EU) 2024/1263, 'net expenditure' means government expenditure net of interest expenditure, discretionary revenue measures, expenditure on programmes of the Union fully matched by revenue from Union funds, national expenditure on co-financing of programmes funded by the Union, cyclical elements of unemployment benefit expenditure, and one-offs and other temporary measures.

<sup>2</sup> Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility, OJ L 57, 18.2.2021, p. 17–75.

Facility is supporting a fair and inclusive recovery in the EU, in line with the European Pillar of Social Rights.

## CONSIDERATIONS CONCERNING FINLAND

- (6) On 10 October 2024, Finland submitted its Draft Budgetary Plan for 2025 to the Commission and to the Eurogroup. On that basis, the Commission adopts this opinion in accordance with Article 7 of Regulation (EU) No 473/2013, and taking into account the Council Recommendation on economic, budgetary, employment and structural policies of Finland of 21 October 2024<sup>3</sup>. This opinion is adopted by the Commission together with the Commission Report under 126(3) of the Treaty and Commission Recommendation for a Council Recommendation setting the net expenditure path of Finland for the years 2025 to 2028<sup>4</sup>, which the Commission expects the Council to act upon in a timely manner.
- (7) On 21 October 2024, upon the Commission recommendation for Council Recommendation on the economic, social, employment, structural and budgetary policies of Finland of 19 June 2024<sup>5</sup>, the Council recommended Finland, in line with the requirements of the reformed Stability and Growth Pact, to limit the growth in net expenditure in 2025 to a rate consistent with, inter alia, putting the general government debt on a plausibly downward trajectory over the medium term and reducing the general government deficit below the 3% of GDP Treaty reference value.
- (8) On 10 October 2024, Finland submitted to the Commission its medium-term fiscal-structural plan in line with Regulation (EU) 2024/1263<sup>6</sup>. The plan commits to net expenditure growth not exceeding 1.6% in 2025, 1.9% in 2026, 2.6% in 2027 and 2.6% in 2028. The Commission has assessed the medium-term fiscal-structural plan of Finland and recommended to the Council to adopt a recommendation setting the net expenditure growth ceilings contained therein. The Draft Budgetary Plan for 2025 is the first step in the implementation of the medium-term fiscal-structural plan.
- (9) According to the Draft Budgetary Plan, Finland's real GDP is projected to grow by 1.7% in 2025 (compared to a decline of 0.2% in 2024), while inflation is forecast at 2.2% in 2025 (1.2% in 2024). According to the European Commission Autumn 2024 Forecast, Finland's real GDP is projected to grow by 1.5% in 2025 (compared to a decline of 0.3% in 2024), while inflation is forecast at 2.0% in 2025 (1.0% in 2024). Overall, the macroeconomic scenario underpinning the budgetary projections in the Draft Budgetary Plan appears to be in line with the Commission's forecast for 2025 and 2024. Finland complies with the requirement of Article 4(4) of Regulation (EU) No 473/2013, since the Draft Budgetary Plan is based on independently produced macroeconomic forecasts.

---

<sup>3</sup> Not yet published.

<sup>4</sup> Commission Recommendation for a Council Recommendation endorsing the national medium-term fiscal-structural plan of Finland, 26.11.2024, COM(2024)715 final.

<sup>5</sup> Commission recommendation for a Council Recommendation on the economic, social, employment, structural and budgetary policies of Finland, 19.06.2024, COM(2024)626 final.

<sup>6</sup> Regulation (EU) 2024/1263 of the European Parliament and of the Council of 29 April 2024 on the effective coordination of economic policies and multilateral budgetary surveillance and repealing Council Regulation (EC) No 1466/97, OJ L, 30.4.2024, ELI: <http://data.europa.eu/eli/reg/2024/1263/oj>.

- (10) Based on the Commission's estimates, the fiscal stance<sup>7</sup> is projected to be contractionary by 0.7% of GDP in 2025, following an expansionary fiscal stance of 0.7% in 2024. This measure of fiscal stance appropriately considers the impact on aggregate demand of expenditure financed by non-repayable support (grants) from the Recovery and Resilience Facility and other EU funds.
- (11) According to the Draft Budgetary Plan, Finland's general government deficit is projected to decrease to 2.9% of GDP in 2025 (3.7% in 2024), while the general government debt-to-GDP ratio is set to increase to 83.2% at the end of 2025 (81.7% at the end of 2024). According to the Draft Budgetary Plan, net expenditure is projected to grow by 3.7% in 2024 and 1.7% in 2025. The growth rate of net expenditure in 2025 according to the Draft Budgetary Plan is above the growth rate in the medium-term fiscal-structural plan submitted by Finland on 10 October 2024. In turn, according to the European Commission Autumn 2024 Forecast, Finland's general government deficit is projected to decrease to 3.0% of GDP in 2025 (3.7% in 2024), while the general government debt-to-GDP ratio is set to increase to 84.7% at the end of 2025 (82.6% at the end of 2024). The decrease in the deficit is driven by different consolidation measures, including an increase in the standard VAT rate by 1.5 pps., in force since 1 September 2024, and expenditure cuts, mostly coming into force at the beginning of 2025. According to the European Commission Autumn 2024 Forecast, net expenditure is projected to grow by 3.1 % in 2024 and 1.7% in 2025. The risks to achieving the fiscal objectives for 2025 set out in the Draft Budgetary Plan are tilted to the downside, and mainly relate to the favourable macroeconomic assumptions and the expected yield of the fiscal consolidation measures of the underpinning the budgetary targets set in the Draft Budgetary Plan.
- (12) The Draft Budgetary Plan assumes that expenditure amounting to 0.2% of GDP will be financed by non-repayable support ("grants") from the Recovery and Resilience Facility in 2025, compared to 0.2% of GDP in 2024. Expenditure financed by Recovery and Resilience Facility grants enables high-quality investment and productivity-enhancing reforms without a direct impact on the general government balance and debt of Finland.
- (13) The Draft Budgetary Plan includes several policy measures with a fiscal impact in 2025. On the revenue side, these include increases in health insurance contributions and reductions in unemployment insurance contributions. On the expenditure side, these measures include broad-based spending cuts, including for healthcare and social support. According to Commission estimates, the overall additional impact of the revenue measures decreases the general government deficit by 0.7% of GDP in 2025.
- (14) According to the European Commission Autumn 2024 Forecast, Finland's net expenditure is projected to increase by 1.7% in 2025, which corresponds to a cumulative growth of 4.8% in 2024 and 2025 taken together. The Commission is of the view that these net expenditure growth rates are not fully in line with the Council recommendation of 21 October 2024 to limit the growth in net expenditure in 2025 to a rate consistent with putting the general government debt on a plausibly

---

<sup>7</sup> The fiscal stance is measured as the change in general government primary expenditure, net of the incremental budgetary impact of discretionary revenue measures, excluding one-off and cyclical unemployment expenditure, but including expenditure financed by non-repayable support (grants) from the Recovery and Resilience Facility and other EU funds, relative to medium-term (10-year) average potential GDP growth rate, expressed as a ratio to nominal GDP.

downward trajectory over the medium term and reducing the general government deficit below the 3% of GDP Treaty reference value. Those net expenditure growth rates would not be fully appropriate initial steps towards the implementation of the medium-term fiscal structural plan<sup>8</sup>.

- (15) According to the European Commission Autumn 2024 Forecast, nationally financed public investment is projected to increase to 4.7% of GDP in 2025 (from 4.2% of GDP in 2024). In turn, public expenditure on EU funded programmes, including Recovery and Resilience Facility grants, is expected to remain stable at 0.6% of GDP in 2025.
- (16) Finally, the Council also recommended Finland to pursue the reform of the social security system in order to increase the efficiency of the social benefits, which would improve incentives to work and support the long-term sustainability of public finances.
- (17) Overall, the Commission is of the opinion that the Draft Budgetary Plan of Finland is not fully in line with the Council Recommendation of 21 October 2024. According to the European Commission Autumn 2024 Forecast, Finland's net expenditure growth in 2025 is not fully consistent with what was recommended by the Council on 21 October 2024. Therefore, the Commission invites Finland to take the necessary measures within the national budgetary process to ensure that the fiscal policy in 2025 is in line with the Council Recommendation of 21 October 2024. The progress made with the implementation of the Council's country-specific recommendations will be assessed by the Commission in spring 2025, in the context of the European Semester Spring Package.

---

<sup>8</sup> According to the European Commission Autumn 2024 Forecast, the annual growth of net expenditure in 2025 exceeds by 0.1% of GDP the maximum from the medium-term fiscal structural plan of Finland.

**Table 1. Key macroeconomic and fiscal figures**

#	Variables		2023	2024		2025	
			Outturn	DBP	COM	DBP	COM
1	Real GDP	% change	-1.2	-0.2	-0.3	1.7	1.5
2	HICP inflation	% change	4.3	1.2	1.0	2.2	2.0
3	General government balance	% GDP	-3.0	-3.7	-3.7	-2.9	-3.0
4	Primary balance	% GDP	-1.8	-2.4	-2.5	-1.4	-1.5

8	Net expenditure growth (cumulative)	% change				5.5	4.8
			<b>Commission Recommendation for a Council Recommendation setting the net expenditure path of Finland</b>				
9	Maximum growth rates of net expenditure (*)	% change		Annual		<b>1.6</b>	
10		% change		Cumulative		<b>5.3</b>	

Notes :

\* According to the Commission Recommendation for a Council Recommendation setting the net expenditure path of Finland for the years 2025 to 2028 and endorsing a set of reforms and investment commitments underpinning an extension of the adjustment period.

\*\* The fiscal stance is measured as the change in general government primary expenditure, net of the incremental budgetary impact of both discretionary revenue measures and COVID-19 pandemic-related temporary emergency measures, excluding cyclical unemployment expenditure, but including the change in expenditure financed by non-repayable support (grants) from the Recovery and Resilience Facility and other EU funds, relative to the medium-term (10-year) average potential GDP growth rate in nominal terms. A negative (positive) sign indicates an excess (shortfall) of primary expenditure growth over medium-term potential GDP growth, which corresponds to an expansionary (contractionary) fiscal stance. For more details, see Box 1 of the Fiscal Statistical Tables.
