

### THE NETHERLANDS: PRIOR GUIDANCE TABLES

This document contains three tables. In line with Art. 9(3) of Regulation (EU) 2024/1263, Tables 1 and 2 provide the minimum level of the structural primary balance ratio necessary to ensure that the headline deficit is maintained below 3% of GDP and that government debt is maintained below 60% of GDP, assuming that there are no additional policy measures beyond an adjustment period of 4 years (Table 1) or 7 years (Table 2). Achieving these minimum levels by the end of the adjustment period implies some fiscal adjustment. Tables 1 and 2 also indicate the impact, if any, of the deficit resilience safeguard described in Art. 8 of Regulation (EU) 2024/1263. Table 3 summarises the main initial conditions and underlying assumptions.
